Automatic Airtop
Coffee Brewer**

(with Hot Water Faucet)

**8782XL
Gourmet 1000™
Extra Low
Automatic Airtop
Coffee Brewer**

(with Hot Water Faucet)

Features

Airtop Coffee brewers offer volume brewing, proper extraction and holding capacity in a limited space. The 8782XL, at an extra low height of only 17 3/4", is sure to fit in those tight counters. These uniquely designed units eliminate flow control problems, and resist clogging in adverse water conditions. Coffee is brewed into a thermal server or airtop for easy transport to remote serving areas where the coffee will be preserved for optimal temperature and taste.

- Exclusive design provides easy access to components for quick, efficient service.
- Water volume adjustments can be made with ease; no tools required and no panels to remove.
- Ready-to Brew light indicated the proper water temperature to help eliminate guesswork in brewing.
- Built-in pour over feature provides flexibility of installation.
- Premium quality thermostat has a stainless steel bulb that recognizes water temperature extremely accurately and cycles less frequently.
- Superior sprayhead design spreads water over the coffee grounds, creating agitation and a floating action that completely saturates the coffee to capture the full rich essence of every bean.
- Unique water valve with built-in flow control assures consistent operation for inlet water pressures between 20 - 80 p.s.i..
- Independent front mounted hot water faucet allows drawing of hot water without affecting coffee taste or brew cycle.
- One-piece drawn stainless steel water tank has a superior design for extended life.
- Rugged base rails provide stability and strength while minimizing brewer height, and provides easy placement of airtop.
- High quality easy to clean stainless steel construction.
